

McCloskey S190 Specification Sheet

The McCloskey S190 is a high-performance mobile screener used in aggregate, construction, demolition, mining, and recycling applications. It's part of McCloskey International's lineup of heavy-duty screening equipment.

Key Features

Screenbox:

- 5' x 20' (1524mm x 6096mm) triple deck or double deck
- Adjustable screenbox angles for optimal screening

High Capacity:

- Engineered to handle high volumes of materials with ease
- Typically used for precision screening of fine materials

Versatility:

- Can be used with a wide variety of materials including sand, gravel, topsoil, coal, aggregates, and demolition debris

Power:

- Diesel or dual power options (diesel/electric hybrid)

Mobility:

- Track-mounted for easy on-site maneuvering

Output Conveyors:

- Multiple conveyors for precise stockpiling and sorting
- Adjustable discharge heights for flexibility

User-Friendly:

- Easy to set up and operate
- Remote control for travel and conveyor adjustment
